PRODUCT INFORMATION
TIE FRONT LEAD APRON PREMIUM LEAD FREE

The Lead Free Tie Front Premium Lead Apron is an excellent option for reducing radiation exposure. It covers the body from the shoulders to the thighs, providing superior anterior torso protection. The apron features a tie-style strap closure, with straps attached to each side of the scapula. These straps crisscross around the back and tie at the front waist, maximizing adjustability. Additionally, it includes a patch pocket on the front and shoulder pads for maximum comfort.

20% lighter than our Economy Lead Free models, this apron enhances comfort and wearability. It features a non-lead bi-layer construction, suitable for both men and women, and is available in five sizes: S, M, L, XL, and XXL. The apron offers two protection options: 0.35mm Pb or 0.50mm Pb lead equivalency, using a non-lead core material. Plus, this lightweight apron is non-hazardous, 100% recyclable, and easy to dispose of.

Furthermore, the core material complies with ASTM F3094-14 testing standards, ensuring reliability and safety. It also comes in four outer materials: Nylon, Ripstop, Polytron, or PVC EasyClean. In addition, the apron is available in various colors, all featuring black binding.

RIPSTOP

Ripstop is a woven fabric that utilizes a reinforcing technique to enhance its resistance to tearing and ripping.

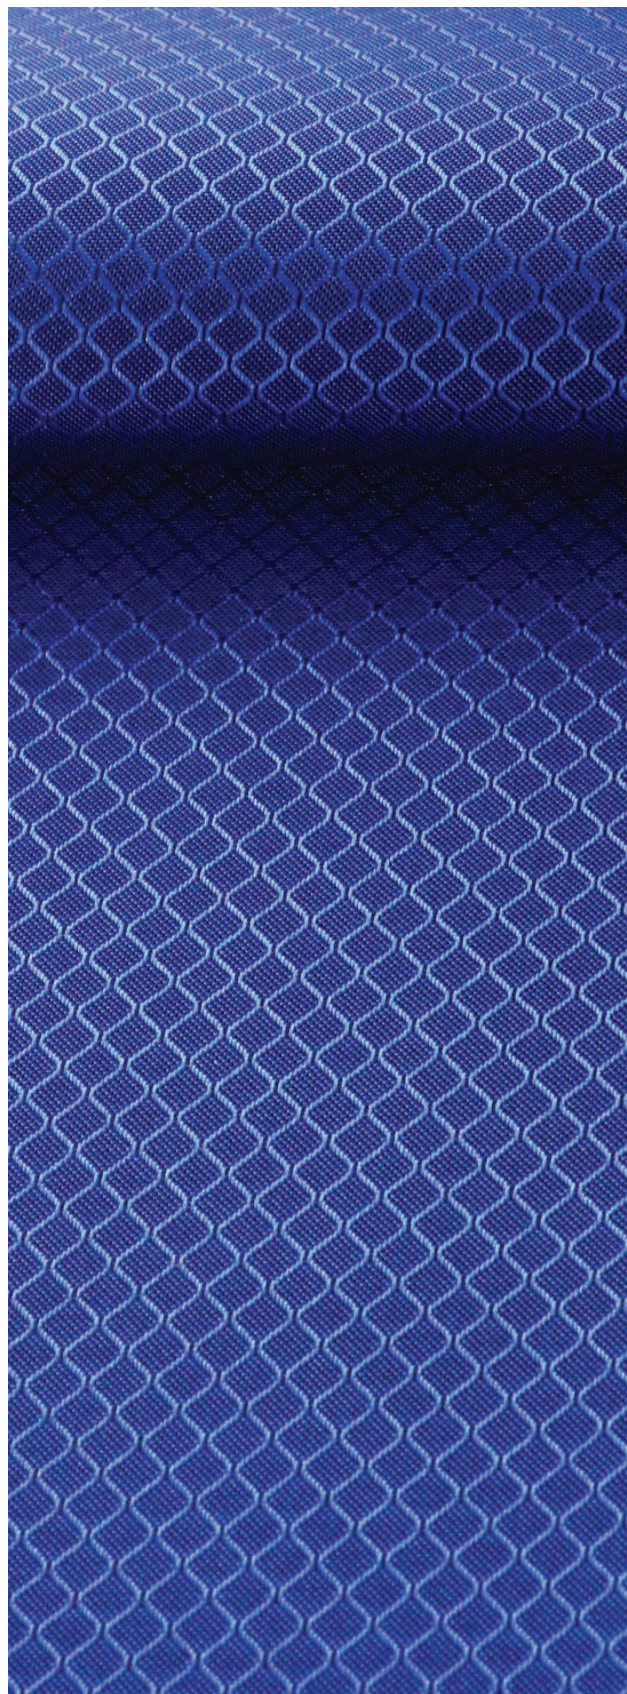

Commonly made from nylon, this lightweight material features interwoven reinforcement threads arranged in a crosshatch pattern, giving it a distinctive diamond-like appearance.
