**PRODUCT INFORMATION**  
FLEXIBACK FRONTAL WITH VELCRO CLOSURE LEAD APRON PREMIUM LEAD FREE

The Lead Free Flexiback Frontal with Velcro Closure Premium Lead Apron effectively reduces radiation exposure. Designed to cover the front of the body from the shoulders to the thighs, it offers excellent anterior torso protection. The flexible back design and straps prevent slipping during procedures. For enhanced comfort and security, the apron includes a Velcro closure at the shoulders and on both sides of the waist. This ensures a snug fit by adhering to the front of the body. Additionally, the apron has a patch pocket on the front and shoulder pads to maximize wearer comfort.

20% lighter than our Economy Lead Free models, this apron enhances comfort and wearability. It features a non-lead bi-layer construction, suitable for both men and women, and is available in five sizes: S, M, L, XL, and XXL. The apron offers two protection options: 0.35mm Pb or 0.50mm Pb lead equivalency, using a non-lead core material. Plus, this lightweight apron is non-hazardous, 100% recyclable, and easy to dispose of.

Furthermore, the core material complies with ASTM F3094-14 testing standards, ensuring reliability and safety. It also comes in four outer materials: Nylon, Ripstop, Polytron, or PVC EasyClean. In addition, the apron is available in various colors, all featuring black binding.

# RIPSTOP

Ripstop is a woven fabric that utilizes a reinforcing technique to enhance its resistance to tearing and ripping.

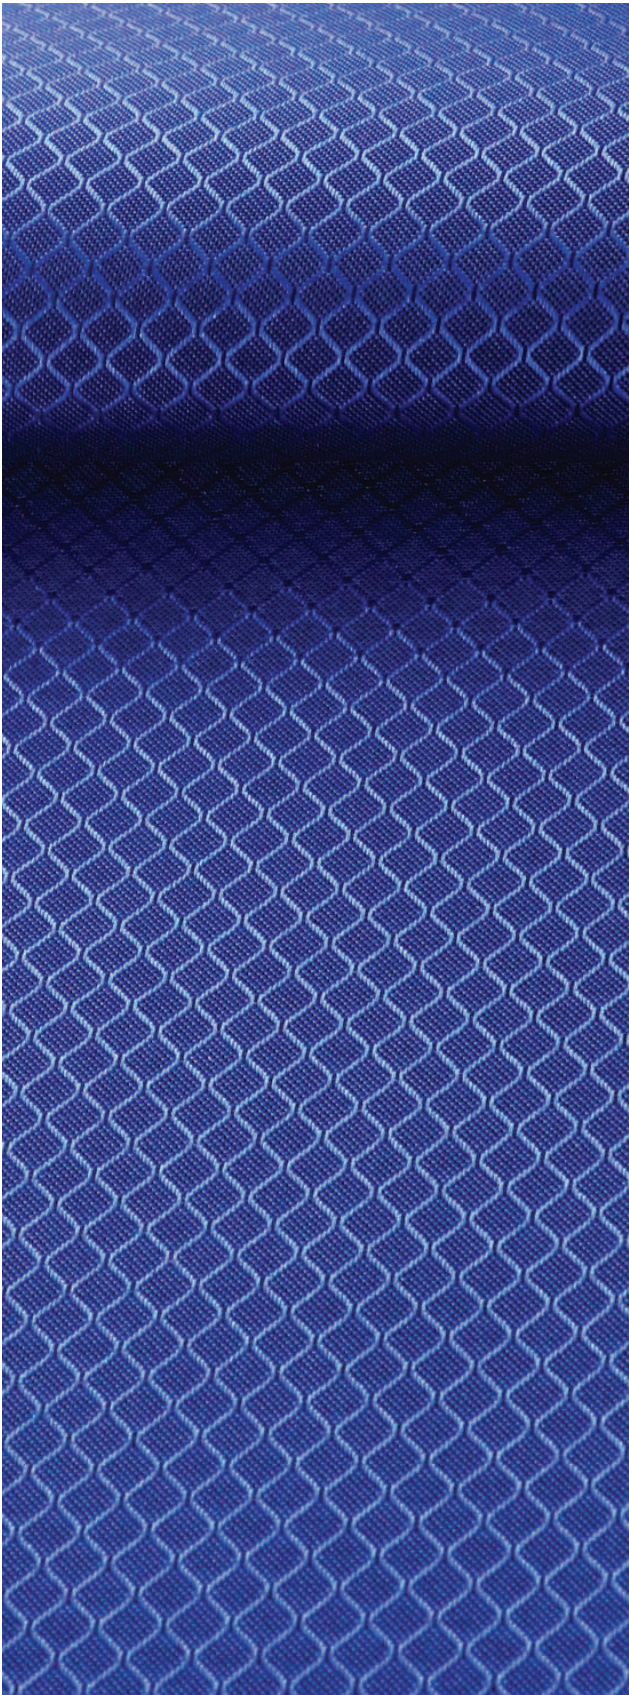

Commonly made from nylon, this lightweight material features interwoven reinforcement threads arranged in a crosshatch pattern, giving it a distinctive diamond-like appearance.
