PRODUCT INFORMATION

TIE FRONT LEAD APRON LIGHTWEIGHT LEAD

The Lightweight Lead Tie Front Lead Apron effectively reduces radiation exposure. Designed to cover the front part of the body, from the shoulders to the thighs, the Tie Front offers excellent anterior torso protection. This lead apron features a tie style strap closure, with tie straps attached to each side of the scapula. These tie straps are crisscross and are designed to fasten the apron to the body while maximizing adjustability, by crossing them around the back and tying them together at the front waist. Plus, this lightweight lead apron features a patch pocket on the front and shoulder pads to ensure maximum comfort.

Suitable for both men and women, the Tie Front Lead Apron comes in five sizes: S, M, L, XL, and XXL. It uses a lead core material and offers two protection options: 0.35mm Pb lead equivalency or 0.50mm Pb lead equivalency. The core material meets ASTM F3094-14 testing standards, ensuring reliability and safety. It is available in four outer materials: Nylon, Ripstop, Polytron, or PVC EasyClean. Additionally, it comes in a variety of colors, all with black binding.
