**PRODUCT INFORMATION**  
VEST AND SKIRT LEAD APRON LIGHTWEIGHT LEAD

The Lightweight Lead Vest and Skirt Lead Apron is a comfortable two-piece apron that reduces radiation exposure effectively. It consists of two separate pieces: a vest and a skirt. The vest covers the front and back of the body, from the shoulders to the waist. The skirt covers the front and back below the waist and above the knees. Together, they provide excellent anterior and posterior torso protection from the shoulders to the thighs. Both the vest and the skirt feature a Velcro closure on the inside, ensuring adjustability and security. The vest also has a patch pocket on the front and shoulder pads for maximum comfort.

Suitable for both men and women, the Vest and Skirt Lead Apron comes in five sizes: S, M, L, XL, and XXL. It is made with a lightweight lead core material and offers 0.50mm Pb lead equivalency protection. The core material meets ASTM F3094-14 testing standards, ensuring reliability and safety. Plus, it is available in four outer materials: Nylon, Ripstop, Polytron, or PVC EasyClean. It is also available in a variety of colors, all with black binding.

# RIPSTOP

Ripstop is a woven fabric that utilizes a reinforcing technique to enhance its resistance to tearing and ripping.

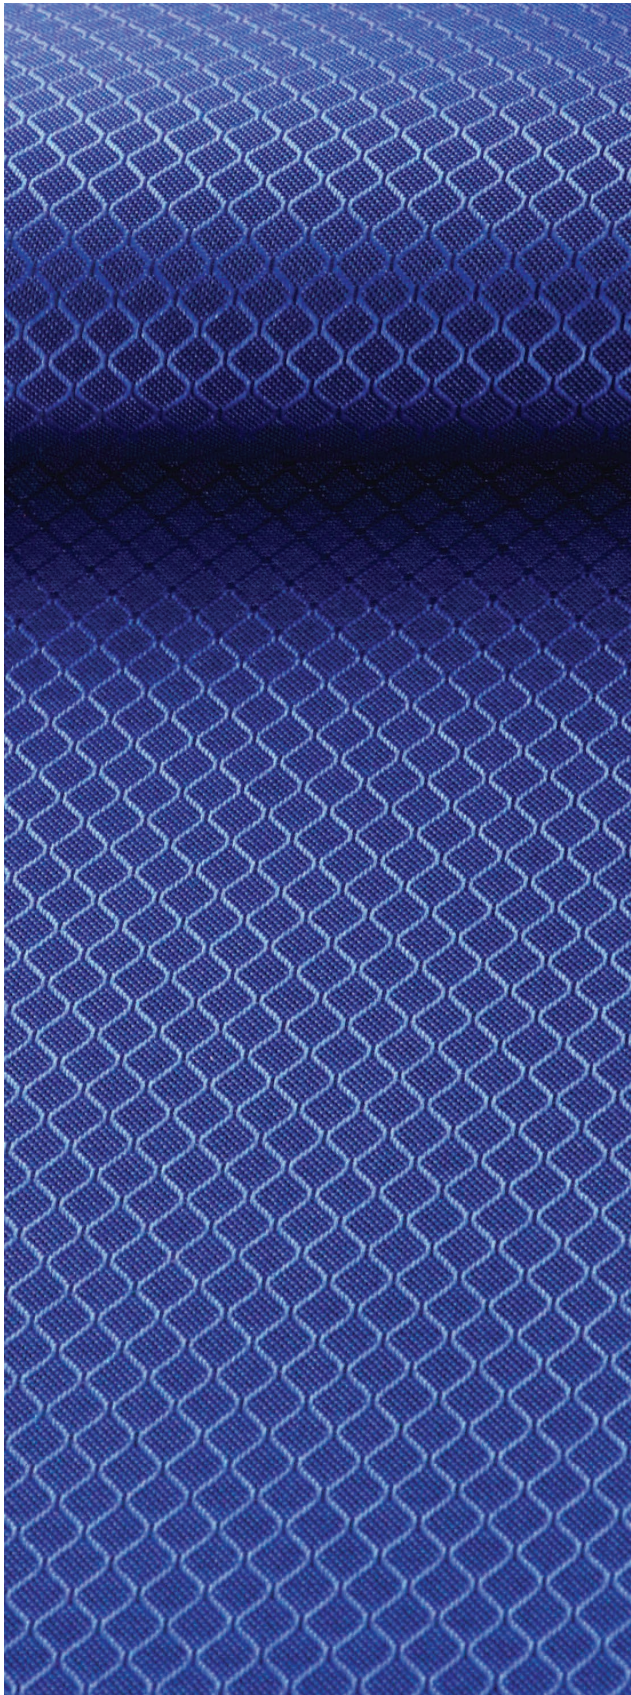

Commonly made from nylon, this lightweight material features interwoven reinforcement threads arranged in a crosshatch pattern, giving it a distinctive diamond-like appearance.

# POLYTRON

Polytron is a smooth, soft-touch fabric made in the U.S. Its flexible and comfortable qualities come from the polypropylene it's made of.

This lightweight material is inherently stain-resistant, free of PFC chemicals, and can be cleaned with bleach.
